

## **Ardisia** Care Instructions

**Common Name: Coral Berry**

Glossy, leathery leaves, slow growing shrub which may get red berries in December. The berries follow tiny little flowers, which appear in summer and stay on the plants for months. Should be kept cool in the winter and away from all droughts at all times. Never let it dry out. Good to prune back in spring after the display of berries is over.

**LIGHT:** Bright light spot away from direct sun.

**WATER:** Keep evenly moist. Water less in winter. Do not let soil dry out. Likes the leaves misted with tepid water.

**TEMPERATURE:** Average temps. Prefers cool winters.

**FERTILIZER:** Monthly
