

Aucuba Care Instructions

Botanical Name: *Aucuba japonica* 'Variegata'

This plant is an evergreen shrub with green or yellow variegated leaves. Female plants can produce coral red fruit in late summer.

Light: Indirect light.

Water: Moderate watering in summer and less in winter. Never let the soil dry out.

Temperature: 55-71 degrees. Avoid strong winds and frost.

Fertilizer: Occasional feeding for garden plants. Half dose fertilized for potted plants in summer when watered.
