

Citrus Care Instructions

This plant thrives in a sunny window. Flowers can be produced year round, but do not always bear fruit.

Light: Bright, direct light.

Water: Twice a week if in direct sun. May require more as plant grows.

Temperature: Warm. Never below 35 degrees. For best results, keep temperature at 55-65 degrees in winter. Keep from freezing. In fall, move indoors before frost.

Fertilizer: Once a month with all-purpose fertilizer. Use an oil spray or insecticide to control insects.
